2. **Geographic Segmentation:**
   - *Solo Leveling* has a significant fanbase in South Korea, the United States, and Southeast Asia. Tailoring content to regional preferences can enhance engagement. For instance, South Korean readers may value more detailed lore, while international readers might prefer action-oriented recaps.

b. Behavioral Segmentation

1. **New Visitors**:
   - These users are likely discovering *Solo Leveling* for the first time or are in the early stages of engagement. They may be drawn to introductory content, such as basic summaries or rankings of the most exciting arcs to help them decide whether to dive into the series.

2. **Returning Visitors**:
   ○ Returning visitors are already familiar with the series and may be looking for in-depth analysis, spoilers, or discussions about specific arcs. These users tend to have stronger engagement with detailed character explorations, plot breakdowns, and theories for upcoming storylines.

3. Tailoring Content for Different Segments

a. Teens (13-18 years)

Teens are likely drawn to the fast-paced action, character growth, and emotional conflicts in *Solo Leveling*. Content tailored to this segment should focus on:
